

## Boston University Cleantech Expo

Wednesday, April 2, 2014

11:30am - 6:00pm

**Boston University School of Management**

595 Commonwealth Ave, Boston, MA

ACTION and Boston University's Feld Career Center are pleased to announce the Boston University Cleantech Expo, featuring two informative panel discussions, and a showcase of companies in the clean energy industry and related fields. The "Cleantech Careers Panel" will highlight how students can access internship opportunities at companies active in clean energy. The "Incubator Success Story Panel" will spotlight the story of a startup company innovating technologies at the nexus of clean energy and clean water that partnered with a cleantech incubator and has successfully developed the company to implement their technology systems.

### **Cleantech Careers Panel: 11:30am-12:15pm**

Learn about paid internships available through the Massachusetts Clean Energy Center (MassCEC) Internship Program, which connects students with internship opportunities at clean energy companies. A student who participated in the program and later found employment in the cleantech industry will share her perspective on the benefits of this program. A Next Step Living recruiter will share her perspective on the panel.

### **Cleantech Showcase: 12:15pm-4:00pm**

Meet clean energy companies from throughout the region exhibiting at this Showcase, to learn about the spectrum of technologies and energy services that are active in this industry. Meet company representatives that are interested in connecting with the BU community, learn about companies that interest you, and develop opportunities for follow up discussions.

If your organization would like **to be an exhibitor** in the Cleantech Showcase, please register [here](#):

### **Incubator Success Story panel : Resolute Marine Energy and Newburyport CleanTech Center: 4:00pm-5:00pm**

Learn about the Association of Cleantech Incubators of New England - ACTION, New England's network of cleantech incubators. An overview of how clean energy startup companies benefit from incubator resources and advisory services will be discussed. The Success Story panel will highlight Resolute Marine Energy, focusing on the progression of the company, the role of a cleantech incubator, and successes achieved.

Resolute Marine Energy, has created a unique technology that uses ocean wave energy to drive seawater desalinization and electricity generation plants. Their systems can provide fresh water and electricity in areas where there is a weak or non-existent electrical grid which enables water resource managers to quickly provide large quantities of clean fresh water wherever needed without the need for diesel-driven systems.

### **Networking Reception: 5:00pm-6:00pm**

Please RSVP to attend the event, [here](#) .
